Investigation Report

Patient Name : **RANJITA KUMARI SHAH**

Patient ID : **ranjita371f**

Age : **30 Y.** Sex: **Female**

Barcode No./ Bill No.: **455549/ 4094/14122**

Referred By : **SELF**

Collected Date : **2080-08-26 11:44:31**

Sent By : **SELF**

Reported Date : **2080-08-26 18:47:23**

Investigation	Result	Reference Range	Unit
TRI-IODO THYRONINE(T3),SERUM	1.11	0.80 - 2.00	ng/mL
CLIA: CHEMILUMINESCENCE IMMUNOASSAY			
THYROXINE(T4),SERUM	9.57	5.10 - 14.10	µg/dl
CLIA: CHEMILUMINESCENCE IMMUNOASSAY			
TSH 3RD GENERATION,SERUM	2.815	0.350 - 4.940	µIU/mL
CLIA: CHEMILUMINESCENCE IMMUNOASSAY			

Interpretation(s):-

TRI-IODO THYRININE(T3),SERUM:-

Triiodothyronine T3, is a thyroid hormone. It affects almost every physiological process in the body, including growth, development, metabolism, body temperature, and heart rate. Production of T3 and its prohormone thyroxine(T4) is activated by thyroid-stimulating hormone(TSH), which is released from the pituitary gland. Elevated concentrations of T3 and T4 in the blood inhibit the production of TSH.

The guideline for age and pregnancy related reference range for T3.

New Born :- 0.75 - 2.60 ng/mL

Children(1 - 15 Yrs) :- 1.05 - 2.41 ng/mL

Pregnancy:-

First Trimester :- 0.81 - 1.90 ng/mL

2nd & 3rd Trimester :- 1.0 - 2.60 ng/mL

THYROXINE(T4),SERUM:-

Thyroxine T4, Thyroxine's principal function is to stimulate the metabolism of all cells & tissue in the body. Excessive secretion of thyroxine in the body is hypothyroidism & deficient secretion is called hypothyroidism. Most of the thyroid hormone in blood is bound to transport proteins. Only a very small fraction of the circulating hormone is free & biologically active.

The guideline for age and pregnancy related reference range for T4.

New Born(1- 4 days) :- 8.2 - 19.9 µg/dl

1 week - 2 week :- 6.0 - 15.9 µg/dl

Pregnancy:-

First Trimester :- 6.6 - 12.4 µg/dl

2nd & 3rd Trimester :- 6.6 - 15.5 µg/dl

TSH 3RD GENERATION(TSH3),SERUM:-

Below mentioned are the guidelines for Pregnancy related reference ranges for TSH.

Levels in Pregnancy :- TSH(µIU/mL)

First Trimester :- 0.1-2.5

2nd Trimester :- 0.2-3.0

3rd Trimester :- 0.3-3.0

TSH concentrations in apparently normal euthyroid subjects are known to be highly skewed, with a strong tailed distribution towards higher TSH values. This is well documented in the pediatric population including the infant age group.
